

Cat & Genny Training – 1 Day

Location and Avoidance of Underground Services or Cable avoidance training (Cat and Genny training) will teach you how to avoid underground cables and pipes whilst excavating roads and pavements

A high proportion of hands on demonstrations and practical exercises, supplemented with classroom based tutorials. A comprehensive training hand out pack will be included. Assessment will be by written test paper and observations during the course.

Delegates should provide their own personal protective equipment, including, hi-vis jacket, gloves, protective footwear, safety glasses and hard hat

On completion of the course, delegates will be issued with a certificate of attendance that is valid for five years.

Topics

- Reasons for using locators – both safety and financial
- Theory – covering both the benefits of the system and the limitations of this cat and genny technology.
